- Above and beyond the requirement of symbols being added
- Finish manager view completely

Task Assignments:

Task Description	Assigned to
Finish Manager View	Yuriy
API Integration for login	Aditya
Above and Beyond requirement	Julio
Deployment and Final integration	Harry

Minutes from Previous Meeting

The customer and cashier views are complete, with minor bugs that can be fixed before the next meeting. The manager view is almost done and will be done by the end of the day, along with the Google authentication system. Most of the work needs to be on the manager's view, and then the above and beyond requirements will be done when the small bug fixes are implemented. After these requirements are complete, we will deploy the entire program, which will be the finalized result.
