

SCRUM Meeting 2 for Project 3 - Panda Express Web Application

Prepared by: Yuriy Astapov

Meeting Date: 10/30/24

Meeting Attendees

1. Julio Dondisch
2. Aditya Gollamudi
3. Harry Liu
4. Yuriy Astapov

Meeting Agenda Items

- Who will be responsible for setting up deployment?
- How is progress on the database connection coming along?

Status Update Since Last Meeting

Accomplishments:

- Customer UI implemented with dummy values. Able to switch between tabs and add dummy values to cart
- Cashier UI also implemented but as a copy of customer UI. Needs updates to make it different

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
Basic customer UI has been implemented	Julio	Yes
Basic cashier UI has been implemented (rough copy of customer)	Julio	Yes

Before The Next Meeting

Plans:

- Figure out if Express is something we want to use for back end or if Python (flask) would be better

- Figure out better version control (had to remake GitHub repo because of unforeseen issues with previous repo)

Task Assignments:

Task Description	Assigned to
Set up database connection using Express	Aditya
Set up remote deployment	Yuriy

Minutes from Previous Meeting

We began by discussing all of the pre-development tasks that were completed or needed to be completed. Julio finished the paper drawings of the UIs, Aditya recreated those designs as hi-fi wireframes, Harry began writing the stories, and Yuriy set up the GitHub repository and began installing the libraries and frameworks we would need to use. At this point, we decided we could begin coding since the rough idea of the UI was finished and we were all happy with it. Since Aditya had done a lot of work with creating the wireframes, Julio was assigned to building a basic UI for the customer view, and Harry and Yuriy were assigned to make any necessary styling changes to it in between. The meeting then concluded.
