- Complete any more additional small changes for customer and cashier view

Task Assignments:

Task Description	Assigned to
API Integration	Harry
Change Cashier and Customer View	Julio
Database Progress	Aditya
Deployment Completion	Yuriy

Minutes from Previous Meeting

In the previous meeting, we discussed the layout and finalized the look of the checkout page. We also discussed making Harry the project manager to help focus on burndown charts and keep up with deliverables needed to maximize points. We discussed some fine details on our finished login page. We also discussed the navigation portal and how every page should be connected, and then we deployed that methodology, which is now completed and focused on its design and application. To conclude, we discussed the database implementation and how the progress is going for that, along with how it should be completed with code reviews—additionally, we discussed how the deployment should be applied since we are still confused on that matter.
